**The Iranian capital will host an international seminar on defense and security in West Asia amid challenges facing the strategic region.**

The Seminar of Peace, Stability and Sustainable Security in Light of Defense Cooperation will kick off in Tehran on Monday with an inaugural speech to be delivered by Secretary of Iran's Supreme National Security Council (SNSC) Ali Shamkhani.

During the day-long event, political, defense and security officials from Asian and European countries are set to express their viewpoints about regional security, terrorism, extremism and the adverse consequences of foreign interference in the internal affairs of countries in the region.

The discussions will be held in specialist panels focusing on ways to manage regional crises with an emphasis on the necessity to put an end to the US and Israeli regime's interference in the region, prevent arms sales among regional countries, the emergence of a new generation of violent dictators in the region and its adverse effects on talks aimed to restore peace to the region.

The participants will also exchange views about ways to fight extremist groups and their allies, security threats emanating from the spread of extremist and Takfiri ideologies in the region and across the world, and the role of diplomacy in settling regional woes.

The international seminar will be held in cooperation with Iran's Supreme National Defense University and the Defense Diplomacy Strategic Studies Center (RAAD).

This movement should've been taken as an important step toward the security and unity of countries long ago. USA, Israel and England are the disease and cancer for our world. Rothschild bankers are in control of USA and most of Europe, so countries must watch for this dangerous mafia.
